LIST OF AUTHORS

	Page
<i>Alm, A.</i>	
The control equipment in Stornorrfor's Power-station ..	187
<i>Bengtson, W.</i>	
Loop regulation in rod and strip mills	89
<i>Bergström, L. R.</i>	
Field tests on 420 kV air-blast circuit-breakers	179
<i>Borg, L.</i>	
Germanium and silicon rectifiers	147
<i>Borgvall, T.</i>	
The control equipment in Stornorrfor's Power-station ..	187
<i>Broström, E.</i>	
New 150-1,500 h.p. induction motors	103
<i>Carlsson, J. E.</i>	
New contactors and contactor-operated 10 A direct-on-line starters	169
<i>Dahle, O.</i>	
The ring toroductor - a torque-gauge, without slip rings, for industrial measurement and control ¹	23
<i>Elmlund, H.</i>	
Distance protection for single-phase overhead lines on electric railways	17
<i>Faxö, L.</i>	
Electronic aids for high-voltage tests	83
<i>Francotte, X.</i>	
The first multi-rope winder in Belgium	107
<i>Garde, A.</i>	
Automatic depth control of submarines	65
<i>Garmo, R.</i>	
The Rapide Blanc Power-station, Canada	40
<i>von Geijer, G.</i>	
Stornorrfor's Power-station	3
<i>Groop, S.</i>	
Field tests on 420 kV air-blast circuit-breakers	179
<i>Hammarlund, P. E.</i>	
Large arc furnaces for steelworks	56
<i>Hedström, H.</i>	
New 150-1,500 h.p. induction motors	103

<i>Lamm, U.</i>	
High-voltage d.c. power transmission	1
<i>Landau, F.</i>	
The first multi-rope winder in Belgium	1
<i>Lidén, I.</i>	
The high-voltage d.c. transmission scheme across the English Channel	1
<i>Lundberg, T.</i>	
An Italian wire-rod mill for high-quality steel	1
<i>Mark, A.</i>	
An interesting mine-hoist delivery to Scotland	
<i>Nordlöf, G.</i>	
The switchgear at Stornorrfor's Power-station	1
<i>Persson, E.</i>	
Automatic depth control of submarines	
<i>Rudqvist, O.</i>	
The control equipment in Stornorrfor's Power-station ..	1
<i>Sollergeren, B.</i>	
The Stornorrfor's transformers	
<i>Strömberg, T.</i>	
The 150 MVA generators at Stornorrfor's	
<i>Sundberg, Y.</i>	
The mains-frequency induction heating of light-alloy billets	
<i>Svidén, S.</i>	
The switchgear at Stornorrfor's Power-station	1
<i>Thorén, B.</i>	
The new Asea High-power Laboratory at Ludvika	1
<i>Wenström, J.</i>	
Germanium and silicon rectifiers	1
<i>Wikman, G.</i>	
Distance protection for single-phase overhead lines on electric railways	
<i>Witt, H.</i>	
Fusion reactions resulting from discharges in deuterium	1
<i>Zinck-Petersen, J.</i>	
The new Asea High-current Laboratory at Ludvika	1

¹ Refers to No. 3

LIST OF CONTENTS

	Page
<i>Research</i>	
the ring torductor - a torque-gauge, without slip rings, r industrial measurement and control ¹	23
Automatic depth control of submarines	65
Electronic aids for high-voltage tests	83
fusion reactions resulting from discharges in deuterium	114
the new Asea High-power Laboratory at Ludvika	131
the new Asea High-current Laboratory at Ludvika	155
r Uno Olsson's work on non-circular gears concluded	173
eld tests on 420 kV air-blast circuit-breakers	179
<i>Nuclear power</i>	
fusion reactions resulting from discharges in deuterium	114
the Swedish State Power Board and Asea sign their ggest contract*	152
<i>Electric machines</i>	
the 150 MVA generators at Stornorrfor	9
the Rapide Blanc Power-station, Canada	40
eteran Asea motors in British cement works	70
ew 150-1,500 h.p. induction motors	103
hydrogen-cooled synchronous condenser rated at 100 VA, 21.5 kV*	127
arge 3,000 r/m squirrel-cage three-phase motors*	128
<i>Transformers</i>	
the Stornorrfor transformers	47
<i>Rectifiers</i>	
igh-voltage d.c. power transmission	141
ermanium and silicon rectifiers	147
perimental locomotive fitted with silicon rectifier* ..	175
<i>Switching and control equipment</i>	
the ring torductor - a torque-gauge, without slip rings, r industrial measurement and control ¹	23
terminal block with isolating device and terminal clamps pin-bolt type*	24
ew high-speed circuit-breaker for d.c.*	44
ontactors for 6 kV*	72
oop regulation in rod and strip mills	89
the switchgear at Stornorrfor Power-station	162
ew contactors and contactor-operated 10 A direct-on- e starters	169
parate thermal relays*	174
ew relay cases of size H 2*	175
regulating equipment for the power-exchange system etween Sweden and Finland*	176
eld tests on 420 kV air-blast circuit-breakers	179
the control equipment in Stornorrfor Power-station ...	187

Refers to No. 3

	Page
<i>Traction and marine equipment</i>	
Asea deck cranes on board m/s Bulimba*	43
Automatic depth control of submarines	65
Experimental locomotive fitted with silicon rectifier* ..	175
One of the most powerful electric locomotives in the world*	207
<i>Cranes and hoists</i>	
An interesting mine-hoist delivery to Scotland	33
Asea deck cranes on board m/s Bulimba*	43
Eight-rope friction-drive hoists for the Soviet Union* ..	100
The first multi-rope winder in Belgium	107
<i>Electric furnaces</i>	
Large arc furnaces for steelworks	56
The mains-frequency induction heating of light-alloy billets	75
Two-chamber induction furnaces with melting ducts in the Asea foundries*	174
The line production of induction stirrers for arc furnaces*	208
<i>Electric power plants and networks</i>	
Stornorrfor Power-station	3
Distance protection for single-phase overhead lines on electric railways	17
The Rapide Blanc Power-station, Canada	40
The high-voltage d.c. transmission scheme across the English Channel	124
The new Asea High-power Laboratory at Ludvika	131
High-voltage d.c. power transmission	141
The new Asea High-current Laboratory at Ludvika	155
The switchgear at Stornorrfor power-station	162
Regulating equipment for the power-exchange system between Sweden and Finland*	176
The control equipment in Stornorrfor Power-station ..	187
<i>Industrial equipments</i>	
Veteran Asea motors in British cement works	70
Loop regulation in rod and strip mills	89
An Italian wire-rod mill for high-quality steel	199
<i>Organisation and staff notices</i>	
New Asea brochures	16
Changes within the Asea Group	22
In memoriam Sven Erik Eriksson	23
Asea exhibition in New York*	23
A new Asea director	43
Asea's activities during 1959	93
The Asea Group throughout the world	98
Sven Gynt awarded the IVA medal	123
New Asea brochures	161
Dr Uno Olsson's work on non-circular gears concluded ..	173
Honorary doctorates for Åke Vrethem and Halvard Liander	206
